

# Oklahoma

## Powerful Insights into Oklahoma Oil & Gas Activity

What's happening between a Lease and a Permit? In Oklahoma, a lot! Regulatory filings like Spacings, Poolings, Location Exceptions tell a competitive intelligence story months before a Permit is ever filed, especially on a map.

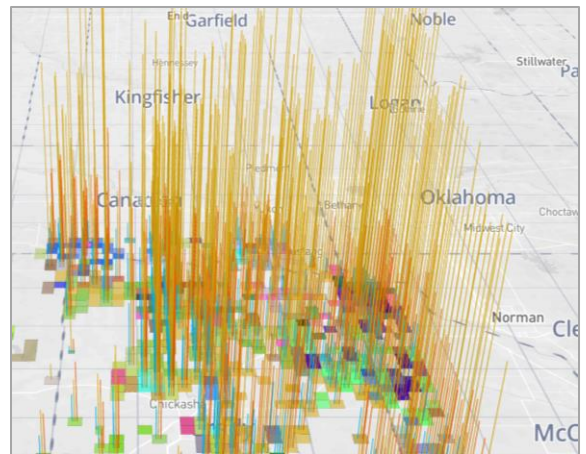

Daily updates of OCC regulatory apps and orders, extracted data (e.g. Respondents, AFE costs, EUR's) & the most current monthly Production data in the industry provide insights you won't find anywhere else.

**With oseberg's Oklahoma data subscription, you'll get access to the richest regulatory datasets in the industry and more.**

- Leases, Assignments, and Mineral Deeds
- Poolings
- Spacings
- Location Exceptions
- Increased Densities
- Unitizations
- Drilling Permits
- Completions
- Transfers
- Commingles
- Production Data
- Pluggings
- Section Regulatory Timelines

**Enhanced workflows that boost the bottom-line.**

- Market intelligence (Who has What Where?)
- Current spacing summaries by Section
- Leading indicators of drilling activity
- Acreage acquisition or defense of existing leasehold
- Early alerts of non-op consent notifications

Pooling with Option 1 Bonus, Dry Hole and Completed Cost
